

TECHNICAL DATA SHEET

Healthy Hooves Plus™ HH 102

Revision Date: 18/02/2020

Product Description

Healthy Hooves Plus™ HH 102 contains mineral chelate, alongside the unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. These sustainable ions bond (chelate) the minerals to keep them in solution, preventing precipitation.

In field trials on farms, Healthy Hooves Plus™ HH 102, has shown to provide a consistently effective footbath life throughout the processing of a 500 cow herd. Healthy Hooves Plus™ HH 102 was developed for use in automatic footbaths and spray systems where it is impractical to make up solutions prior to use.

Benefits

1. Sustains active mineral chelate levels.
2. Contains T Tree Oil for added cleansing
3. Safe to use for both the operator and the environment.
4. Reduces hazardous waste in the slurry.
5. Suitable for use in a wide range of automatic footbaths and spray systems.

Properties

| | |
|------------------------------------|-------------------|
| Form: | Liquid |
| Specific Gravity: | 1.010-1.035 |
| Colour: | Aqua / green |
| Odour: | Faint |
| Solubility: | Complete in water |
| pH (Neat): | <2.6 |
| pH 1% in solution H ₂ O | 2.6 to 3.0 |

Method of Use

Healthy Hooves Plus™ HH 102 is used at 4% by volume, when introducing the product on farm after a introduction period of using for 10 milking's per week for 4 weeks the in use % maybe reduced to 2% This allows for a maximum of 500 cow passes per 200 litre footbath. Please note the products is used in conjunction with existing hoof care protocol.

Process of Use

Healthy Hooves Plus™ HH 102 should be used as follows for the best results:

Footbath twice daily, five days per week, for the first three weeks.

Followed by twice daily, three days per week, for ongoing use.

Packaging

20 litre drums.

200 litre barrels.

1,000 litre IBCs.
