Healthy Hooves Eco™

Solutions for Footbaths

The Footbath Solution for Cattle & Sheep

Livestock Tread more easily with:

Healthy Hooves Eco™ contains an unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. These sustainable ions bond (chelate) minerals such as Zinc (Zn++) to keep them in solution, preventing precipitation. In addition the Eco contains disinfectants, wetting agents and an antiseptic to assist with the cleansing of the hoof.

Proven in field-trials on farms, **Healthy Hooves Eco™** has shown to provide a an effective footbath life throughout the processing up to 800 ewes per 100 litre footbath.

Fast acting, Easy to use & Safe

Healthy Hooves Eco™
Solutions for Footbaths

Direction for use

For Penned and walkthrough application:

Initial Use:

Use **Healthy Hooves Eco™** @ 4% with 1% Zinc Sulphate, footbath for 4 consecutive days.

= 800 Sheep Passes for a 100 litre footbath

Ongoing Use:

Use **Healthy Hooves Eco™** @ 2% with 1% Zinc Sulphate, footbath as required.

= 800 Sheep Passes for a 100 litre footbath

For spray application:

Use **Healthy Hooves Eco™** @ 4% with 1% Zinc Sulphate. Apply daily as required.

Also Suitable for Cattle

For use in cattle footbath:

Use **Healthy Hooves Eco™** @ 2% with 2% Copper Sulphate for 2 consecutive days. Apply every 6-8 weeks.

“Reduce the cost of hoof care”
