

Calf scour relief

Naturally

Dia-Care for calves

Dia-Care is a dietary supplement composed of natural raw materials that:

- Supports and improves the calf's immune system.
- Helps reduce fluid and nutrient loss due to Scour (diarrhoea).

Use Dia-Care Pill for non-drinking calves and at the first onset of Scour.

The active components from the pill are gradually released into the digestive tract. This allows the product to be more active and effective in the gastrointestinal tract for a longer.

The pill is small and can easily be administered orally via an applicator.

Product is based on biochar:

Composition: magnesium fibre, dicalcium fibre & carbon.

Additives per kg: Aromatic substances 31.000 mg.

Contains:

Raw Protein	0%	Sodium	0%
Raw Fat	26%	Magnesium	19%
Crude Fibre	0%	Calcium	5.7%
Raw Ash		Phosphor	2%

The timetable below shows the typical age at which calves may be affected by these pathogens.

Calf scours timetable (approximate age in days)																								
	Calves (days old)																							
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	
E Coli	■	■	■	■	■	■	■	■	■															
Rotovirus				■	■	■	■	■	■	■	■	■	■	■	■	■	■							
Coronavirus				■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■
Salmonella						■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■
Crypto									■	■	■	■	■	■	■	■	■	■	■	■	■	■	■	■

Other infectious organisms such as Coccidia, BDVD Clostridium perfringens and other E.coli may also affect calves, often after 3-4 weeks of age.

Application of the Dia-Care pill.

Calves with early Scour and/or calves that have mild scour:

- 2 pills on day 1
- 1 pill for three consecutive days

Calves with very serious Scour and dehydration:

- 2 pills per day for four consecutive days

Non-Drinking calves:

- 1 pill on first day

A second pill may be administered on day 2 if required.

As a preventive dose 1 pill per day, maximum 4 days, from birth.
