

GrainSense

**WE HELP
FARMERS
THROUGH
SCIENCE**

A man with a beard, wearing a brown jacket, is seated on a John Deere tractor in a field of tall grass. He is holding a handheld electronic device. The tractor's side panel features the embossed text "JOHN DEERE". The scene is illuminated by the warm, golden light of a setting or rising sun, creating a serene atmosphere. The background shows a line of trees under a clear sky.

A laboratory in the hands
of every farmer

Farmers have to make complicated
decisions without data

GrainSense gives you an
instant number on

PROTEIN

Laboratory level accuracy in the field.

MOISTURE

Faster and better accuracy on a wider range.

OIL

The number to know for oil seed farmers.

CARBOHYDRATES

A key component for industrial use.

Prove your quality,
on the spot

Your results are stored in
the GrainSense App

Laboratory level quality for the field

High standards in accuracy and design.

Patented optical measuring and calibration methods.

New grain types can easily be added.

Small sample size – just one teaspoon is enough.

Easy to use and ergonomic.
