Essential for: **advisors, farmers,
contractors, growers and
local authorities**

The UK Pesticide Guide 2020

What's new for 2020?

By far the biggest change to *The UK Pesticide Guide in 2020* is the loss of a number of active ingredients that have been fundamental to many crop protection programmes.

The final use-up of chlorothalonil formulations, propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting **new** additions.

- **Aclonifen** is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops.
- BASF is launching its new triazole, **mefentrifluconazole**, which promises to restore full triazole activity, at least initially.
- On the insecticide front the new active ingredient from Corteva Agriscience, **sulfoxaflor**, is now listed for use in *Cucurbitae* and ornamentals under full protection for control of aphids and whitefly.

Essential pesticide information

The UK Pesticide Guide 2020 and ukpesticideguide.co.uk are produced by an independent editor and are unique and authoritative sources of information on pesticides and adjuvants approved for use in agriculture, amenity, forestry, pest control and horticulture.

In the book...

The content of *The UK Pesticide Guide 2020* is divided into easy to find sections:

- **Crop/pest guide index**
- **Pesticide profiles**
- **Products also registered**
- **Adjuvants**
- **Key information for users of pesticides**
- **Suppliers of pesticides and adjuvants**

and online...

The online resource contains ALL the data from the printed guide but is updated throughout the year. Additional online content backed by a powerful search engine includes:

- **Maximum approved dose, maximum total dose and latest approved timings**
- **Harvest intervals and mode of action**
- **Hazard categories and LERAP classifications**
- **Links to EAMU recommendation sheets and supplier details**
- **Links to MRLs within CRD online database**
- **Latest news and developments**
